

LEGAL EASE

AI-Powered Legal Document Generator

PHASE-WISE PROJECT DEVELOPMENT

Based on the uploaded project presentation

Phase 1 – Requirement & Project Planning

Task	Description
1	Identify the problem of manual legal-document preparation.
2	Define the objective: collect user details and generate structured legal documents.
3	Plan the guided workflow from login to PDF download.
4	Identify major modules: authentication, document selection, details collection, AI generation, preview/edit, download and

Phase 2 – User Interface & Authentication

Task	Description
1	Create the web interface using HTML, CSS and JavaScript.
2	Implement registration and secure sign-in.
3	Provide a simple, guided user flow.
4	Create screens for document selection and user-detail entry.

Phase 3 – Document Details & Backend

Task	Description
1	Build the Flask backend using Python.
2	Create dynamic fields based on the selected document type.
3	Collect and process document-specific inputs.
4	Connect the application with SQLite for users and documents.

Phase 4 – AI Document Generation

Task	Description
1	Send collected details through the application flow.
2	Use the AI generation layer to create structured document content.
3	Use a document builder/template approach to organize the generated output.
4	Prepare the generated document for user review.

Phase 5 – Preview, Edit & PDF Output

Task	Description
1	Display the generated document for preview.
2	Allow users to review and modify the generated content.
3	Generate the final PDF document.
4	Provide a convenient download option.

Phase 6 – Document History & Testing

Task	Description
1	Store generated-document information in the database.
2	Provide document history so previous documents can be tracked.
3	Test login, document selection, data entry, generation, editing and PDF download.
4	Check the complete USER → DATA → AI → DOCUMENT → PDF workflow.

Phase 7 – Future Enhancements

Task	Description
1	Support more types of legal documents.
2	Improve AI-generated document accuracy.
3	Add multilingual document generation.
4	Enable secure cloud storage and sharing.
5	Provide an advanced user dashboard.

Overall Project Flow

LOGIN → SELECT DOCUMENT TYPE → ENTER DETAILS → AI GENERATION → REVIEW / EDIT →
DOWNLOAD PDF

Technology Stack

Frontend: HTML, CSS, JavaScript

Backend: Python, Flask

Database: SQLite

AI Layer: AI-based generation

Development: GitHub Codespaces

Project Conclusion

Legal Ease combines web technologies, Flask, SQLite and AI to simplify legal document creation. The workflow supports user input, structured AI generation, review/editing, PDF output and document history.
